

25X1

Copy 6 of 7

30 April 1956

Dear Bill -

25X1

Effective immediately each roll of film exposed at the site and consigned to [] will contain in its shipping container your completed form entitled "Data - Exposed Undeveloped Film."

Data on this form need not be typed but can be completed in legible long hand, preferably in ink. By use of carbon paper an additional copy can be obtained for your files for further reference or duplication.

With the reminder that in all cases the F factor in altitude is understood, the procedure for shipping exposed and unprocessed film along with its data in the same container has been approved by our Security personnel. We also feel this system will expedite the work at the consignee's plant.

George
